

Window stomping

If you happen to be passing by Simons department store (977 Ste-Catherine W.) and notice something moving in the shop window, don't be alarmed. It's all part of a dance happening called **Projet Vitrine**. Last year, organizers **La 2e Porte à Gauche** approached the downtown department store with a proposal to give modern dance extra exposure through three of the windows during the shop's store hours. "We wanted to find a way to show contemporary dance in a different way," says organizer **Karine Cloutier**. "We're assured of having an audience there."

More than 60 participants will take part in the event, which includes choreographies, improvisation and a video installation. For a more detailed schedule, consult the group's Web site at www.la2eporteagauche.ca.
